Cable tray support fixing feet

Overview

Rooftop foot supports, commonly also known as a Fix-It Foot, are rubber or plastic floor supports that are used to elevate pipework, cable trays and other equipment above the rooftop surface. HVAC and air conditioning units in both indoor an outside locations also provides anti-vibration support for solar thermal and solar PV installations on flat roofs. This flexible rubber support helps distribute weight evenly and prevents roof. The JP1001 are a floor mounted Rubber Support designed to support Air Source Heat Pumps (ASHP), pipe work and cable tray. Suitable for external and internal locations for temperatures between -40°c to 80°c. They offer an alternative to open wiring or electrical conduit systems and are necessary for cable management in commercial and industrial construction, as well as. Rubber Mounting Feet support systems have 21mm x 41mm channel recessed into the top face. They allow the installation and assembly of load bearing or suspended structures, those attached directly to the wall, or to tracks for the attachment of clamps and/or other.
