400G optical transceiver module for base stations

Overview

The 400G DR4 optical module is a high-speed optical transceiver module compliant with the IEEE 802. With a transmission rate of up to 400 Gbps, 400G transceivers offer double the capacity of their predecessor (200G transceivers). 400G. The Cisco ® family of QSFP-DD modules provide the industry's highest bandwidth density while leveraging the backward compatibility to lower-speed QSFP pluggable modules and cables. The Cisco 400GBASE Quad Small Form-Factor Pluggable Double Density (QSFP-DD) portfolio offers customers a wide variety. PAM4 (4-Level Pulse Amplitude Modulation): This is the predominant modulation technique used in 400G modules. 3bs standard, designed specifically for medium-to-short distance transmission in 400G Ethernet. Key benefits include: Increase switching bandwidth by a factor of 4.
