24-core fiber optic patch panel Huijue

Overview

The 1U 24 port fiber patch panel is design to realize the connection between external optical cables and pigtails, it is available to configure with SC/LC plate as application need. It has four cable entry points on the back fitted with rubber grommets to protect the fiber optic. Fiber Optic Distribution BoxHJ-GF-KJW-24COverviewFiber-optic cable distribution box (FODB) GF-KJW-24B is a 24-core plastic fiber distribution box, has the functions of fusion and optical distribution. Environmental conditions Company Introduction:Established in 2001, Shanghai. The 24 port fiber optic patch panel is reliable fiber optic organization and distribution products, it is sliding type, convenient for operations and maintenance, The 24 port fiber patch panel has wide operation temperature and suit density fiber optic installations. Application: It is applicable. Fiber optic patch panel is an integrated unit for fiber management, ATY Fiber offer wall mounted fiber optic patch panel and rack mounted fiber optic patch panels, these equipment function is to fix and manage the fiber optic cables inside the box as well as provide protection. Offering a balance between density and manageability, the 24-core. The Centrix™ System is a high-density fiber management system that provides a balance of industry-leading density with innovative jumper routing. The system can be deployed in multiple applications including: central office, headend, FTTx, FTTCS and data center.
