Distribution Box Protection Layout

Overview

Each SPD level needs protection. Make sure the breaking capacity is higher than the biggest short-circuit current. Think about response time, service life, cost, maintainability, flow capacity, and humidity resistance when choosing an SPD. Tip: Always check the space between your. As a leading manufacturer of high- and low-voltage electrical equipment that strictly follows the IEC, GB/T, and ISO9001 standards, Chuanli specializes in producing high-performance cable distribution boxes, including outdoor equipment and customized distribution boxes solutions. If you put the SPD too far away or use long wires, it will not work as well. A good spd layout helps panels deal with surge protection. Indication Lights: These provide visual availability and status of mains power supply. Each component plays a specific role. Smart DB boxes have extra parts like energy monitoring units and communication modules.
