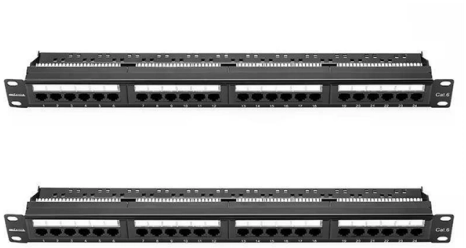
Belgian Silicon Photonics Technology



Overview

The company focuses on integrated photonics development, specifically highlighting its work in silicon photonics and silicon nitride photonics. A Belgian entrepreneur is set to invest hundreds of millions of euros to establish a cutting-edge photonic chip centre in Flanders, a move expected to bring 500 jobs to the region. The new facility will occupy the former site of BelGaN, once the nation's only chip producer, which declared. With a proven track record in advanced silicon photonics, R&D, and a state-of-the-art integrated silicon photonics and silicon nitride photonics platform, imec is your ideal development partner in realizing your silicon photonics solution. Imec's cutting-edge optical devices are processed at wafer. Thema Foundries is Europe's only dedicated backend photonics foundry, built from the ground up to deliver what the industry has been waiting for: production-scale on-chip laser integration. The Bottleneck Holding AI Back. The initiative is expected to create around 500 jobs and could put Europe on the map in a. A new chip factory is to be built in Oudenaarde on the former site of BelGaN, the chip manufacturer that went bankrupt last year.

Top 100 Silicon Photonics Companies in Belgium

The Silicon Photonics industry in Belgium presents several key considerations for those interested in exploring this dynamic field. Belgium is home to a robust

Photonics Research Group

Vacancies PhD: III-V/Si laser frequency combs for data communications PhD: Ultra-low background photonic integrated waveguides for on-chip Raman spectroscopy More highlights Upcoming events:

First European photonics plant boosts Belgian chip

A Belgian entrepreneur is set to invest hundreds of millions of euros to establish a cutting-edge photonic chip centre in Flanders, a move expected to

Integrated photonics

Our in-depth silicon photonics technology and design knowledge is supported by our expertise centers in advanced material and component analysis, modeling,

Thema Foundries | Europe''s First Dedicated Backend

Founded by a strong combination of high-tech investors and recognized experts with deep experience in the design and production of high-volume photonic

Former BelGaN site to become Europe''s first ''full

A Belgian–European entrepreneur is set to establish a state-of-the-art photonic chip hub in Flanders, marking a long-awaited investment of more

Photonic | B-PHOT Brussels Photonics | Vrije

The B-PHOT Photonic Integrated Circuits team has built up extensive expertise in the modeling, design and experimental demonstration of integrated photonic

Pioneering photonics business to be built on site of

While BelGaN focused on GaN chips, the new company is focusing on integrated photonics. This involves using light particles – photons – instead of

OneTouch Technology

At OneTouch Technology BV, we are architects of the future, driven by innovation and a relentless pursuit of excellence. As a new-generation optical

Swave Photonics hiring Senior Mixed Signal Design Engineer

© 2026 AK OPTICAL SYSTEMS - All rights reserved

At Swave Photonics, we''re not just dreaming about the future: we''re building it! We are a fabless semiconductor company that designs and markets holographic chips based on proprietary diffractive

Samsung Electronics Launches Silicon Photonics

Samsung Electronics'' foundry division has officially announced its entry into the silicon photonics market. Silicon photonics is a technology that

Micro-Transfer Printing of Lithium Niobate on 200 mm Silicon Photonics ...

Micro-transfer printing (MTP) has emerged as a promising technique for the wafer-scale heterogeneous integration of thin-film lithium niobate (TFLN) onto silicon photonics (SiPho) platforms.

NVIDIA Announces Spectrum-X Photonics, Co

NVIDIA today unveiled NVIDIA Spectrum-X™ and NVIDIA Quantum-X silicon photonics networking switches, which enable AI factories to connect

Nvidia invests $2B in Marvell as part of new interconnect ...

In parallel, Nvidia will work with Marvell to “advance world-class networking for AI, including advanced optical interconnect solutions and silicon

Annual Global IC Fabs And Facilities Report

Organizations worked together to solve current technology challenges, including soaring demand for AI chips and advanced memory, as well as

Photonics and Advanced Packaging Program Manager

Work closely with design, process, test, packaging, and reliability engineering teams to ensure successful technology development and delivery. Stay current on developments in Silicon

Nvidia bets $2 billion on Marvell as rising AI adoption

Nvidia has invested $2 billion in Marvell Technology as part of efforts to make it easier for customers to use the custom artificial intelligence chips that

Bankrupt Belgian fab pivots toward photonic IC production

Onsemi''s Belgian GaN spinout bankrupt BelGaN, the GaN spinout from onsemi in Belgium, has filed for bankruptcy. BelGaN in Oudenaarde was
