Cable tray connection fixing plate

Overview

A cable tray joint plate is a flat metal piece used to join two cable trays. It comes with drilled holes for nuts and bolts. Connecting cable trays correctly is essential for system safety, load stability, and long-term performance. They offer an alternative to open wiring or electrical conduit systems and are necessary for cable management in commercial and industrial construction, as well as. At PowerCableTray, we provide heavy-duty Coupler Plates (Joint Levers) designed to ensure the maximum mechanical strength and electrical continuity of your cable management system. Whether you are installing ladder trays, perforated trays, or wire mesh systems, our connectors provide the rigid. The screw-on cable tray systems fulfil the requirements of "IEC 61537:2006 – Cable management – Cable tray systems and cable ladder systems" for the low-voltage area.
