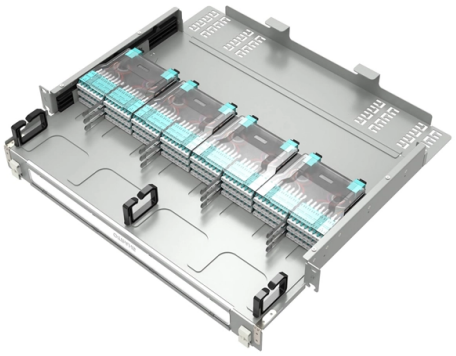
# Cable tray fixed on one side



## Overview

Designed to be fixed to the underside of desktops these cable basket trays can hold multiple power and data cables as well as underdesk power supplies, data hubs and routers. The tray can be dropped down on one side to allow for cables to be retrofitted. Cable basket trays, made from steel wire, are lightweight and easy to install, allowing cables to enter the tray at any point along the length. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resil- for each of these installation challeng-ience and safety. es in the industrial environment. Our cable support. With this pair of Cable Trays, you can tame your messiest cable problems. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transposed to si osure, overheating or. This publication is intended as a practical guide for the proper and safe* installation of cable ladder systems, cable tray systems, channel support systems and associated supports.
