Cable tray price galvanized

Overview

Cable Tray Prices Discover cable trays with CE certification, available in stainless steel, aluminum, and galvanized materials. Ideal for industrial cable.

Key Takeaways

Galvanized cable trays in South Africa range from light-duty pre-galvanised to medium/heavy-duty hot-dip galvanised, with prices influenced by size, finish, and delivery. Types and FinishesPre-galvanised (PG) trays: Light-duty, suitable for mild corrosion environments. Example: a 50mm light-duty tray, 3 meters long, with 0.8mm thickness and 13mm side rail height, finished in Z275 galvanised steel.

Hot-dip galvanised (HDG) trays: Medium to heavy-duty, offering enhanced corrosion resistance for demanding environments. Example: a 100x50mm wire mesh tray, 3 meters long, side wall height 50mm, hot-dip galvanised.

Price Considerations

Prices vary depending on tray type, dimensions, and finish. Light-duty pre-galvanised trays are generally more affordable than hot-dip galvanised trays. Delivery costs may apply, especially for lengths exceeding 2 meters, which require truck delivery.

Additional factors affecting price include material thickness, side rail height, and duty rating (light, medium, heavy).

Purchasing Options

Suppliers like Advanced Strut and Online Electrical offer a range of galvanized cable trays, including perforated, wire mesh, and ladder types, with both pre-galvanised and hot-dip galvanised finishes. Online stores provide fast delivery and bulk purchase options, which can influence the final cost.

Summary

For budgeting purposes, expect light-duty pre-galvanised trays to be the most cost-effective, while hot-dip galvanised trays are more expensive but provide superior durability. Prices are influenced by tray length, width, duty rating, and delivery requirements, so contacting suppliers directly for a quote is recommended to get the most accurate and up-to-date pricing.
