How much does it cost to make cable tray bends

Overview

Learn how to get quick and accurate cable tray pricing for your projects. This guide covers new builds, renovations, and custom systems.

Key Takeaways

The cost of cable tray bends varies depending on material, size, angle, and manufacturing method, typically ranging from a few dollars per piece for standard bends to higher prices for custom or heavy-duty configurations.

Factors Affecting Cost

Material Type: Steel, aluminum, and stainless steel are commonly used. Aluminum is lighter and easier to handle but may cost more per unit than steel, while stainless steel offers corrosion resistance at a premium price. Bend Angle and Configuration: Standard horizontal or vertical bends (e.g., 45° or 90°) are less expensive than custom angles or complex multi-directional bends.

Manufacturing Process: Cable tray bends are produced using roll forming, cutting, punching, and bending operations. Automated roll-forming machines reduce labor costs and improve precision, but initial machinery investment can be significant. Size and Load Capacity: Larger trays or bends designed to carry heavier cables require thicker metal and more robust fabrication, increasing cost.

Supplier and Location: Prices vary by manufacturer and region. Bulk orders or local suppliers may reduce costs, while imported or specialty bends may be more expensive.

Typical Price Range

Standard horizontal or vertical bends for small to medium cable trays can cost approximately $10–$50 per piece, depending on size and material. Heavy-duty or custom bends may range from $50–$150 or more per piece, especially for stainless steel or large industrial applications. Wire mesh or basket-type bends are generally cheaper and easier to install, often costing less than solid metal bends.

Cost-

Saving Tips

Use modular, pre-fabricated bends to reduce labor and installation time. Purchase in bulk to lower per-unit cost. Consider aluminum or wire mesh trays for lighter loads to save on material and handling costs.

Optimize shipping and storage by stacking bends efficiently to reduce logistics expenses. In summary, the cost of making cable tray bends depends on material, size, complexity, and production method. Standard bends are relatively affordable, while custom or heavy-duty bends can significantly increase project costs.

Proper planning and supplier selection can help manage expenses effectively.

Cable Tray Fitting, 90° Junction Kit. Material: Carbon Steel. Finish: Electroplated Zinc. Includes: (1) Hardware for (1) Tee (2) 90° Bends. CleanTray 45-Degree Elbows for 45-degree turns in applications

Cable Tray Installation Cost per Meter – Price Estimator

The cost of steel cable trays generally falls between $5 and $25 per meter, depending on several factors such as the tray''s gauge, finish, and the specific features of the tray.

Metalix Cable Trays

Crafted from premium materials such as galvanized steel, aluminum, and stainless steel, our bends are designed to withstand heavy loads, resist corrosion, and maintain long-lasting performance. Each

Cable Tray Manufacturing Machine Solution: CNC Punching, Press

Cable tray manufacturing machine solution for accessories, brackets and sheet metal parts: CNC punching, press brake bending, laser or shearing cutting, molds and tooling.

Cable Tray Bend | Information by Electrical Professionals for ...

Table 2 of NEC provides the minimum radius of conduit bends. Is there some similar table or other reference available for the minimum radius of cable tray bends? For example, if we

How To Bend Cable Tray

Discover the best techniques and tools to bend cable tray easily and efficiently. Learn step-by-step instructions and tips from industry experts.

Make a 90 Bend in Electrical Cable Tray

How to make a 90 electrical cable tray bend to measurement of your choice. Great if you are new or just forgot how to do it, this easy to follow guide makes it so simple.

Cable Tray Estimator

We offer complete kits to provide you with cable tray ready to install under new or existing raised floors based on the unique requirements at your facility.

How to Make an Internal Bend in Steel Cable Tray Using a Crimping

Students trading aid on how best to put an internal 90 degrees bend in steel cable tray. Includes a full demonstration on how bend steel cable tray using a bending machine and how to use a ...

How to make a bend on an open cable tray

© 2026 AK OPTICAL SYSTEMS - All rights reserved

This video shows you how easy it is to form and bend an open cable tray from SILTEC - suitable for cables and pipes. See how easy it is to cut the threads away and bend the tray. For more details ...
