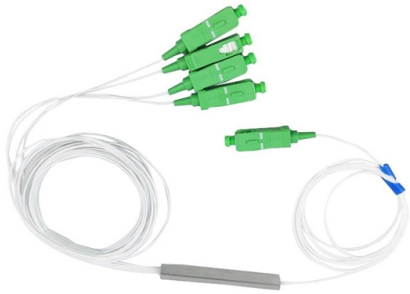
DMD Spatial Light Modulator Price Quote



Overview

Find top dmd spatial light modulator products with 1920x1080 resolution, 0. 7 inch chip size, and HDMI input. Click to discover high-performance options for advanced imaging needs. The choice extends far beyond basic pixel count, requiring a careful balance of performance specifications, integration complexity, and total cost of ownership. 7-inch XGA UV DLP® digital micromirror device (DMD). Digital Micromirror Devices (DMDs) are advanced micro-electromechanical systems (MEMS) that form the core of Digital Light Processing (DLP) technology developed by Texas Instruments. A DMD is an array composed of multiple high-speed digital light reflectors, consisting of many small aluminum mirrors. The number of mirrors corresponds. Meadowlark Optics' Liquid Crystal on Silicon (LCoS) Spatial Light Modulators (SLMs) are uniquely designed for pure phase applications and incorporate analog data addressing with high refresh rates (1400 Hz).

Article Content

dmd spatial light modulator: Precision Imaging Solutions

Find top dmd spatial light modulator products with 1920x1080 resolution, 0.7 inch chip size, and HDMI input. Compare verified suppliers, MOQ < 5, and 2026 pricing trends. Click to

Spatial Light Modulators

Spatial Light Modulators - GoPhotonics - Digital Micromirror Device (DMD) 24 Spatial Light Modulators from 2 Manufacturers meet your specification.

© 2026 AK OPTICAL SYSTEMS - All rights reserved

Digital Micromirror Device| SIMTRUM Photonics Store

SIMTRUM''s Digital Micromirror Device is a type of spatial light modulator that modulates the amplitude, direction, and/or phase of incident light. A DMD is an

Advanced DLP® Technology | DMD-Based Spatial Light

Digital Micromirror Devices (DMDs) are advanced micro-electromechanical systems (MEMS) that form the core of Digital Light Processing (DLP) technology

DMD Spatial Light Modulator System DLP9500UV UV Enhanced

Supplier highlights: This merchant is a manufacturer and trader offering full customization capabilities.

Spatial Light Modulators – Buying Guide & Suppliers

This spatial light modulators buying guide provides technical background, comparison of major types, selection criteria, and an overview of suppliers.

DLP301S Near-UV Digital Micromirror Device (DMD)

Texas Instruments DLP301S Near-UV Digital Micromirror Device (DMD) is a digitally controlled micro-opto-electromechanical system (MOEMS) spatial light modulator (SLM). The DMD displays a crisp

Ultra High Speed Digital Micromirror Spatial Light Modulators

Browse 8+ ultra high speed digital micromirror spatial light modulators from WaveQuanta''s catalog. Detailed specifications, datasheets, and 3D models available for each product.

DLP Devices

The DLP chip, or Digital Micromirror Device (DMD), is an array of micromirrors that can be used for high-speed, efficient, and reliable spatial light modulation. Not only a leader in consumer

Spatial Light Modulators

24 Spatial Light Modulators from 2 manufacturers listed on GoPhotonics. Search by specification. Selected filters - Country : global, Slm Type : Digital Micromirror Device (DMD), Page-1

Spatial Light Modulator Market

Spatial light modulators, which dynamically control light patterns in applications such as laser beam shaping, holographic displays, optical computing, and biomedical imaging, are gaining

© 2026 AK OPTICAL SYSTEMS - All rights reserved

Applications of Spatial Light Modulators in Raman

Advances in consumer display screen technologies have historically been adapted by researchers across the fields of optics as they can be used as

Spatial light modulator design and generation of

Spatial light modulators (SLMs) are versatile devices used for optical studies. These instruments have a wide area of application in photonics.

Beijing Univision Photonics Technology Co., Limited

HDSLM D Series high-speed edition HDSLM D series DMD spatial light modulator is developed based on DLPC900, DLPC910 and DLPC410 chips. It has a variety of

Analysis of Leading DMD Spatial Light Modulator Companies in 2025

With the continuous innovation in optoelectronic technology, the value of DMD spatial light modulator companies is increasingly prominent in both research and industrial fields. These

Advanced DLP® Technology | DMD-Based Spatial Light

By rapidly tilting toward or away from the imaging system, each micromirror modulates light by binary amplitude modulation, enabling precise spatial light

Spatial light modulators

Spatial light modulators The SPIE Digital Library offers a comprehensive collection of research articles, conference papers, and technical documents focused on spatial light modulators (SLMs), reflecting

Spatial Light Modulator (SLM) | MEETOPTICS

Spatial Light Modulators (SLM) are used to modulate the amplitude, phase or polarization of light as a function of time. Find and filter SLMs at MEETOPTICS.
