Ml2437a Optical Power Meter

Overview

The ML2437A Power Meter combines the advantages of thermal meter accuracy, diode meter speed, and peak power meter display graphics. The result is a single instrument that samples at more than 35K per second and achieves 90 dB dynamic range with a single sensor. This meter includes graphics display. Anritsu Company has prepared the product user documentation for use by Anritsu Company personnel and customers as a guide for the proper installation, operation, and maintenance of Anritsu Company equipment and software programs. We stock all major equipment types such as Spectrum Analyzers, Signal Generators, Oscilloscopes, Power Meters, Network Analyzers etc from all the major suppliers. The ML2437A Power Meter combines the advantages of thermal meter accuracy, diode meter speed, and peak power meter display graphics. The result is a single instrument that samples at more than

Power Meters and Power Sensors

Anritsu offers the world''s most comprehensive range of power meters. The ML2490A series has the performance required for narrow, fast rising-edge pulse power measurements (for example, radar).

Optical Power Meters

Optical Power Meter Guide Optical power meters and detectors have been served by Newport for over 30 years. The offering ranges from a low cost, hand-held meter to the most advanced dual channel

ML2430A SERIES POWER METER

The ML2430A Series Power Meter will operate from AC or DC main power with this battery removed. This battery is not used for the retention of nonvolatile memory functions.

Anritsu ML2437A RF Power Meter with Graphics Display

Anritsu ML2437A RF Power Meter features a graphics display, ruggedized housing, and 90 dB dynamic range for precise measurements.

Optical power meter

An optical power meter (OPM) is a device used to measure the power in an optical signal. The term usually refers to a device used for measuring the average power in fiber optic systems.
