Optical cable traction machine hand pull

Overview

Optical cable traction machines are widely used in optical fiber communication, power, and municipal engineering for cable laying and construction. They can lay up to 288-core optical cables in underground, overhead, or pipeline scenarios, with automatic pre-tension adjustment to. The optical cable traction machine is suitable for 4-288 core optical cable, 7*2. 6mm steel stranded wire, 4*35mm2 cable. Unlike standard electrical power cables, fiber optic cables contain fragile glass strands that. Supplier highlights: This supplier mainly exports to Saudi Arabia, the United States, and Nigeria, offering flexible customization services such as full customization and design-based customization, with product certifications and achieving a 100. This product has acquired. The main products include: wire coil forming machine, optical fiber cable cutting machine, cantilever take-up machine, wire straightener and other auxiliary equipment and mechanical accessories. Can provide support for OEM&ODM projects. the leading level and obtained a number of national patents.
