Key Takeaways

VP distribution boxes are versatile electrical or IT distribution solutions designed for decentralized power, signal, and data management in industrial, construction, and IT environments. OverviewVP distribution boxes can refer to both electrical distribution boxes and products offered by VP Distribution, a company specializing in IT and Pro-AV solutions. In electrical contexts, these boxes are used to distribute power safely and efficiently to multiple devices or workstations, often in industrial or construction settings.

They can be portable or fixed, and are designed to meet safety standards such as IP44 or IP67 for protection against dust and moisture.

Electrical Distribution Boxes

Portable Socket Distributors (SVP): Compact units supplying hand-operated power tools via CEE connectors, with connected loads from 11 to 44 kVA and socket outlets up to 63A. They are impact- and weather-resistant, often used on construction sites downstream of main distribution cabinets. Decentralized Distribution Boxes: Installed close to the load, these boxes support energy, signal, and data distribution in buildings or industrial plants.
