Distributor-compatible pluggable optical module PAM4

Overview

100G PAM4 QSFP28 is a pluggable, DWDM, fiber-optic transceiver for 100 Gigabit Ethernet (100GbE) applications. This module is designed for the data centers to interconnect, which requires high fiber capacity for links up to 80 km. The optical interface utilizes two DWDM wavelengths. DOUBLE PERFORMANCE, SAME SIZE, the Amphenol AOP 56Gbps commercial temperature " Quad Embedded Pluggable Transceiver ” is designed for highly challenging applications where high performance is crutial. Capable of speeds up to 56Gbps at distances up to 70m from 0 to 70°C. The Marvell® PAM4 optical DSP portfolio, including Spica™ and Nova™ DSPs, addresses the critical the need for high-bandwidth optical interconnects to power AI infrastructure. Marvell leads the pluggable module ecosystem with low-power, high-performance silicon for AI, cloud, enterprise and 5G. The Broadcom compatible QSFP112 optical transceiver is an 400Gb/s single-port QSFP112, DR4 single-mode parallel transceiver using a single, 4-channel MPO-12/APC optical connector. The short reach 4-channel (DR4) design uses 100G-PAM4 modulation and has a maximum fibre reach of 500-metres using OS2. DCP-M is a true open line DWDM platform designed specifically for modern DCI. DCP-M has the form factor and usability of a passive multiplexer, but unlike a passive multiplexer it monitors the traffic, amplifies the signals for longer distances and can handle higher data rate protocols. Cloud is the network® Marvell's innovative COLORZ Silicon photonics technology integrates hundreds of discrete components on a single die, resulting in the industry's first low power. Power Consumption 6W Tested in Targeted Switches for Superior Performance, Quality, and Reliability DWDM for Multiple Applications over One Duplex Fiber Reach up to 80km (EDFA and TDCM Required) High-Speed Electrical Interface Compliant to IEEE 802. 3bm Hot Pluggable QSFP28 MSA Compliant Digital.
