Overview

A distribution box, or DB box, is a circuit breaker enclosure. It is a vital part and central hub of any electrical system. The hub distributes electrical power from a single input source to various circuits throughout a building. Whether it's a home, office, or factory, the DB box makes sure power. A distribution board (also known as panelboard, circuit breaker panel, breaker panel, circuit breaker, electric panel, fuse box or DB box) is a component of an electricity supply system that divides an electrical power feed into subsidiary circuits while providing a protective fuse or circuit. These Distribution Boxes enable decentralized installation of the electronics close to the load. The range of applications extends from pure energy distribution in buildings to building automation and through to industrial plants. SMART DISTRIBUTION BOXES FOR FLEXIBLE BUILDINGS. Available in 4-39 ways, single/double/triple layers, ideal for industrial, commercial, and photovoltaic applications. Check dimensions & specs now! EKDB10 series.
