Fiber optic HC coupler

Overview

Get low-loss fiber optic adapters/couplers with good repeatability and durability for precisely mating two ends of a fiber optic cable. Multiple connector options available.

Key Takeaways

A fiber optic HC coupler is a device that splits or combines light between optical fibers, typically using fused, micro-optic, or planar lightwave circuit technology for high-performance applications.

Overview

A fiber optic coupler is an optical device that connects multiple fibers, allowing light from one input fiber to be distributed to one or more output fibers, or vice versa.

H

C couplers are often designed for high coupling efficiency, low insertion loss, and stable performance across specific wavelength ranges, making them suitable for telecommunications, sensing, and high-power fiber systems.

Types of Fiber Couplers

Fused Fiber Couplers

Fabricated by thermally tapering and fusing fibers so their cores are in intimate contact over a few centimeters. Offer low insertion loss (~0.3 dB) and high power handling. Coupling ratio is wavelength-dependent, with standard couplers operating over ±15 nm and broadband couplers over ±40 nm or more.

Micro-

Optic Couplers

Use lensed fiber collimators with an optical element between them. Provide ultra-broad bandwidth (±200 nm), high polarization extinction ratio (>30 dB), and excellent thermal stability. Allow integration of filters or polarizers but are more expensive than fused couplers.

Planar Lightwave Circuit (PLC) CouplersFabricated using photolithography and etching on a planar substrate. Ideal for high fiber counts (1x4, 1x8, 1x16) with compact size and broad bandwidth. Typically have fixed splitting ratios and lower power handling due to epoxy-based light paths.

Key Features

Directional Coupling: Light entering an input port is transferred primarily to output ports with minimal back-reflection, quantified by high return loss.

Polarization-

Maintaining Options: PM couplers preserve the polarization state of light, critical for interferometry and sensing applications.

Wavelength-

Specific Designs: Dual-window or broadband couplers can operate efficiently at multiple wavelengths, e.g., 1310 nm and 1550 nm for telecom networks. Fiber Compatibility: Available for single-mode (SM), multimode (MM), double-clad, and large-core fibers.

Applications

Telecommunications: Splitting or combining signals in fiber networks. Optical Sensing: Distributing light to multiple sensors or interferometers.

High-

Power Fiber Systems: Pump-signal combiners in fiber lasers and amplifiers. Optical Coherence Tomography (OCT): Low-loss couplers for precise imaging.

Considerations

Insertion Loss: Lower is better for high-efficiency systems. Coupling Ratio: Must match the application requirements (e.g., 50: 50, 90: 10). Wavelength Range: Ensure the coupler operates efficiently at the intended wavelengths.

Power Handling: Important for high-power laser applications. Fiber optic HC couplers are essential components for efficient light distribution and combination in modern optical systems, with multiple fabrication technologies available to optimize performance for specific applications.

Article Content

Fused Fiber Optic Couplers / Splitters

Thorlabs offers a varied selection of single mode (SM), polarization-maintaining (PM), multimode (MM), and double-clad fiber couplers, as well as 1x8 and 1x16

Fiber Optic Adapters, Fiber Optic Couplers

Get low-loss fiber optic adapters/couplers with good repeatability and durability for precisely mating two ends of a fiber optic cable. Multiple connector options available.

Fiber Optic Couplers & Adapters

Our fiber couplers are designed to address a multitude of applications. We offer fiber optic couplers for simplex and duplex cable; made of plastic or metal; in single mode or multimode; with connector

Fiber Coupler Tutorials

For combining light of different wavelengths, Thorlabs offers a line of single mode wavelength division multiplexers (WDMs). The ports on our 1x2 couplers are configured as shown in Figure 1A.

Single-mode fiber coupling in OpticStudio – Ansys Optics

This article demonstrates how to set up a coupling system and examines the multiple tools available in Sequential Mode for beam and fiber coupling analysis,

Fiber Optic Couplers | Fiber Optical ST Couplers for Sale | RS

Fiber Optic Couplers Whether you''re building a high-capacity data center or maintaining a local telecommunications hub, selecting the right fiber coupler maintains signal integrity and minimizes

What Is Fiber Optic Coupler and How Does It Work?

Fiber optic couplers are used to split or combine optical signals in optical fiber systems. It contains various types like optical splitters, optical combiners and optical couplers. This tutorial

Fiber Couplers/Splitters/Combiners

We offer a full line of fiber optic couplers and splitters supporting SM, MM, PM, large core, and double-clad fibers across 300–2000 nm, with power handling up to 100 W and operating temperatures up to

Fiber Coupler Tutorials

© 2026 AK OPTICAL SYSTEMS - All rights reserved

Definition of 1x2 Fused Fiber Optic Coupler Specifications This tab provides a brief explanation of how we determine several key specifications for our 1x2 couplers. 1x2 couplers are manufactured using

Amazon : Fibershack

Our Fiber Optic Couplers join seamlessly with our popular Fiber Cables which are sold in 1ft, 1M, 2M, 3M, 5M, 10M and more sizes. Simplex and Duplex Couplers and kits designed for busy professionals

Buy fiber optic couplers from the experts

Fiber optic couplers - Solutions for your network requirements Your expert for first-class fiber optic couplings Fiber optic couplers are indispensable for stable and high-performance fiber optic

1x2 and 2x2 Singlemode Fiber Optic Couplers

Newport''s wide range of Fiber Optic Couplers have been developed using fused fiber technology. The optical fiber couplers allow bi-directional coupling and can be used to either split or combine signals.

Fibre Couplers

Fibre optic adapters/couplers for ST, SC, LC, FC, MU, ESCON, MTRJ & E2000 fibre connectors from stock. Couplers are available in simplex (to connect single fibres) and duplex (to connect two fibres)

Comprehensive Guide to Fiber Optic Couplers and

Couplers and adapters used within the isolating structure allow the connection of different types of optical fibers while ensuring that the loss of the

Fiber Optical Coupler: Design, Working, and Its Types

An optical coupler is one of the most commonly used devices in the telecommunication and electronic industry. Since its introduction, it has become an extremely important component in

Fiber Directional Coupler

A fiber directional coupler is defined as an optical component that splits and combines optical signals by utilizing the interference of evanescent waves from two closely positioned fibers, enabling power

Fiber Couplers & Adapters

Fiber Couplers & Adapters 6 X LC to SC Fiber Adapters Female/Female | Duplex Metal Hybrid Housing, Singlemode / Multimode Adapter. Extend your LC 1.25mm ferrule / SC 2.5mm ferrule fiber optic

© 2026 AK OPTICAL SYSTEMS - All rights reserved

What Is Fiber Optic Coupler?

What is a fiber optic coupler? A fiber optic coupler is a passive device that distributes or combines optical signals between two or more fibers. It enables signal sharing in multiple directions,
