Fireproof cable tray connecting piece

Overview

The Fireproof Cable Tray Connecting Plate is a specialized safety accessory designed to maintain the integrity of cable tray systems during fire emergencies, while providing a secure mechanical connection between tray sections. Engineered to prevent flame spread and smoke penetration through cable. FireMaster® products insulate cable trays carrying instrument control cables to ensure that the cables can operate long enough to allow process shut down during fires. Meka Pro's manufacturer assurance is based on tests that are carried out, not just on simulation. The following charts give the number of 3M pillows needed to completely firestop an opening that cable tray passes through. UL Listed Systems Concrete Wall - C-AJ-4056 3 HR F-Rating, 3/4 HR T-Rating Gypsum. The FireBox portfolio from OBO connects safety-relevant electrical cables in a fireproof manner.
