Imported 400G Optical Switch

Overview

Want to buy best 400G Switch? Topstar Technology Industrial Co.,Ltd. is a best 400G Switch suppliers from China,more buying choices at opticalmodulemanufacturers .

Key Takeaways

Imported 400G optical switches enable ultra-high-speed data transmission at 400 gigabits per second per port, supporting modern data center and carrier network requirements.

Overview

A 400G optical switch is a high-performance networking device that routes and switches data at 400 gigabits per second per port. These switches rely on 400G optical transceivers to convert electrical signals into optical signals for fiber transmission, enabling high-speed, low-latency connectivity across data centers, enterprise networks, and service provider infrastructures. The most common transceiver form factor is QSFP-DD (Quad Small Form-Factor Pluggable, Double Density), which uses eight electrical lanes at 50 Gb/s each with PAM4 modulation to achieve 400G throughput.

Key Features

High Bandwidth: Supports 400G Ethernet per port, reducing the number of required links compared to multiple 100G connections. Form Factors: QSFP-DD and QSFP112 are widely used, with hot-swappable modules for easy upgrades and maintenance. Transmission Distance: Varies by transceiver type: SR8: Short-reach multimode fiber, up to 100m over OM4 fiber.

© 2026 AK OPTICAL SYSTEMS - All rights reserved

DR4/FR4/LR4: Longer reach single-mode fiber, ranging from 2 km to 10 km depending on the module. Compatibility: Compliant with IEEE standards (e.g., P802.3bs) and MSA specifications, ensuring interoperability with switches, routers, and NICs. Applications: Ideal for data center interconnects (DCI), high-performance computing (HPC) networks, enterprise core and aggregation layers, and hyperscale cloud environments.

Advantages of 400G SwitchesScalability: Fewer ports and cables are needed to achieve high throughput, simplifying network architecture. Power Efficiency: Modern 400G silicon and PAM4 modulation reduce power consumption per bit compared to multiple 100G links. Flexibility: Supports smooth upgrades from 200G or 100G networks, enabling incremental scaling without major infrastructure changes.

High-

Density Connectivity: Supports multiple transceiver types for short, medium, and long distances, allowing flexible deployment across racks and data centers.

Considerations for Imported Units

When importing 400G optical switches, consider: Vendor Certification: Ensure the switch and transceivers are compatible with your existing network hardware. Warranty and Support: Imported modules often come with one-year warranties and logistics support for safe delivery. Environmental Specifications: Check operating temperature ranges (typically 0–70°C) and compliance with RoHS and other safety standards.

Packaging and Handling: Proper anti-static and shockproof packaging is essential to prevent damage during international shipping.

Conclusion

Imported 400G optical switches provide high-speed, scalable, and energy-efficient solutions for modern networking needs. By selecting compatible QSFP-DD or QSFP112 transceivers and considering reach, modulation, and vendor support, organizations can effectively upgrade their infrastructure to meet growing data demands.

China 400G Switch,400G Switch Suppliers,Manufacturers

Want to buy best 400G Switch? Topstar Technology Industrial Co.,Ltd. is a best 400G Switch suppliers from China,more buying choices at opticalmodulemanufacturers .

400G Data Center Switches

The Edgecore DCS520 is a high-performance spine switch for data centers, offering line-rate L2 and L3 switching across 64 x QSFP56-DD ports. It supports various

Original Factory 400g Optical Transceiver Qsfp112 100m 850nm Fiber ...

Since our establishment in 2013, we have been aggressively participating in developing, manufacturing and selling all kinds of optical transceivers and cables. Our products are widely used in

400G Optical Transceivers | OEM Compatibility

Our 400G optical transceivers are 100% compatible with leading OEM brands such as Cisco, Juniper, Arista, Huawei, Nokia, Dell, and more. This

400G OSFP/QSFP-DD/QSFP112 Ethernet Optical Transceivers

NADDOD provides high-quality, high-capacity 400G Ethernet transceivers for RoCE networking, including 400G OSFP, QSFP-DD, and QSFP112 optical transceivers.

400G OSFP

The 400g SFP modules produced by SULITON are suitable for most switch brands on the market, such as MSA, Cisco, Huawei, Juniper, Dell, Edge-Core and other

400Gb Data Center Switches

FS 400G data center switches offer high speeds and port densities to meet the network deployment requirements of various scenarios and the evolving requirements of next-generation data center

Wholesale Optical Transceivers Module | 100G QSFP28, 40G QSFP

Shop high-speed optical transceivers from Unitekfiber. We offer 100% compatible 40G, 100G, and 400G QSFP-DD modules for data centers. Expert technical support & wholesale pricing.

Cisco 400G Data Center Networking

Transform your data center networking infrastructure with high-density 400G Cisco switches scalable to 800G. Optimized for simplicity and sustainability.
