Fiber Optic Expansion Patch Cord

Overview

A fiber patch cable is a fiber optic cable with connectors on both ends. They are also called fiber jumpers. Used to connect optical transceivers ↔ transceivers, switches ↔ patch panels, or cross-connect. As networks move to higher speeds and higher density, choosing the right fiber optic patch cords becomes critical to the reliability of your system. These connectors enable quick connections of fiber optic patch cords to optical switches, telecommunications networks. Executive Summary: With data center traffic doubling every three years and enterprise networks pushing toward 400G and 800G speeds, choosing the wrong fiber optic patch cable does more than create a bad connection—it creates a cascading performance bottleneck that haunts your operations team for. Get low-loss fiber patch cables & cords with various connector options that support fiber optic cabling up to 400G.
