Fiber optic patch panel to RJ45

Overview

The short answer is no - RJ45 connectors are designed for electrical Ethernet signals, while fiber optics transmit light pulses through glass or plastic. However, modern networks often combine both technologies. L-com's versatile USP (Universal Sub Panel) selection includes a multitude of connector configurations to satisfy all your connectivity needs. We offer Fiber Optic, GPIB, RJ45 Patch Panel, RJ11, RJ12 modular, D-subminiature, USB, Audio/Video,and Mini Din USP patch panels. Each sub- panel can be. Fiber optic patch panels support different fiber optic cables, beginning at OM1, through OM5, with the higher number cables offering greater performance. These devices and systems use light to transport data and provide better dependability and bandwidth than conventional copper connections. They are indispensable in. Only 16 left in stock - order soon.
