FTTR Drop Fiber Optic Cable

Overview

An FTTH drop cable is a specialized optical cable designed for the final segment of an FTTH network. Short. For Internet Service Providers (ISPs) and network operators, the Fiber-to-the-Home (FTTH) race is a race for reliability. While backbone and distribution networks get the most attention during planning, the success of the entire architecture rests on the most fragile link: the fiber optic drop. Optical fiber drop cable, also known as FTTH (Fiber to the Home) cable, serve as the critical final segment in fiber optic network. These cable bridge the gap between an ISP's backbone infrastructure and end-user premises, enabling high-speed internet, voice, and data service in residential. Drop cables are the critical connection between a service provider's distribution network and the end user's home or business.
