P series distribution boxes

Overview

The P-Series units are made with galvanized metal enclosures resisting rust and include features such as plug on neutral, factory installed ground terminations, elevated neutral bars with backed out screws, tangential knockouts, one tool installation, and self leveling center. The P-Series units are made with galvanized metal enclosures resisting rust and include features such as plug on neutral, factory installed ground terminations, elevated neutral bars with backed out screws, tangential knockouts, one tool installation, and self leveling center. Equipped with VD wire 2. Stackable box with fixing lugs for screw and nail attachment. Distributor boxes bundle several cables into one master cable that is connected to the controller. Thanks to the status indicator, you have an overview of a large number of signals. Distributor box, application: Standard, connection. Our flexible distribution boxes enable reliable, decentralized signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. Dimensions are shown in mm (in. The distribution boxes provide a variety of connection methods and colors for user. Are you looking for a compact, easy-to-install waterproof fuse and relay box?

The HWB60-AL Series Hard-Wired Waterproof Power Distribution Box with AssureLatch™ (PDM71009ZXM) is a great choice for protecting accessory circuits and overflow circuits from a main power distribution module (PDM).
