Gyts5336 core optical cable

Overview

GYTS fiber optic cable is outdoor fiber cable with corrugated steel tape armored. Features: –Up to 432 fiber cores. Loose tube construction, tubes jelly filled, elements (tubes and fillers when necessary) laid up around metallic central strength member, polyester yarns used to bind the cable core, filling compound filled in the apertures of the cable core, two ripcords, steel tape armored, then PE outer sheath. All the PBT tape (PSP) into a compact and round shape. –The loose tube stranding technology make the fibers have. 12-24-48-72 Core GYTS Armored Loose Tube Outdoor Fiber Optic Cable The fibers, single mode or muti mode, are positioned in a loose tube made of a high modulus plastic. The tubes are filled with a water-resistant filling compound.
