Lighting Distribution Box Lighting Devices

Overview

Low Voltage Lighting Distribution Boxes are specialized electrical enclosures designed to distribute and control power to multiple lighting circuits. These boxes typically operate at voltages below 1000V AC or 1500V DC, making them suitable for a wide range of lighting applications. Its main functions include protecting the lighting circuits from electrical faults, managing voltage levels, and. The distribution fuse box forms the heart of every electrical system and ensures that lighting systems can be operated safely, efficiently and in accordance with standards. It protects cables and devices from overload, disconnects circuits in the event of a fault and thus guarantees maximum safety. Our boxes feature a modular design with 4-24 positions, supporting 220V-380V AC, 50/60Hz, and up to 100A.
