Network rack placed at an angle

Overview

The standard rack angle position is 44 mm behind the door opening. Angle Brackets provide sturdy support for equipment while using 0U of rack space, allowing customers to maximize every inch of their enclosure. Designed for strength and efficiency, these brackets offer a robust 200 LB weight load capacity, making them an ideal solution for space-conscious. Free browser-based rack layout designer. Drag & drop servers, switches, PDUs and more into your rack. 100% local, no registration required. For joining cabinets with rack angles in the full forward position, use. Angled Ethernet cables, often referred to as right-angle patch cables, are a specialized type of networking cable that features connectors designed to exit at an angle rather than extending straight out. It is fits for Networking system and computer supervising system etc. ※Photos and pictures are for reference only, please be based on the actual products.
