# Optical Cable Removal Machine

## Overview

Fiber Cable Stripping Machines are devices used to remove the outer jacket of fiber optic cables. Optical fibers are typically protected with fiber coatings made from polymers such as acrylate, silicone or polyimide. Fiber strippers are precision tools that reliably and cleanly remove a defined length of coating. The smart automatic 3-in-1 function can realize the simultaneous completion for process of "Cable peeling - Kevlar shearing - Outer sheath splitting" at same by just one action. 0mm optical cables 1200 cables/hour.
