PLC distribution box protection

Overview

Built with sealed enclosures (typically IP65 or higher rated) to protect internal PLC components from moisture, dust, UV exposure, and temperature extremes. Best for: Outdoor installations, construction sites, agricultural systems, marine applications, and oil & gas facilitiesTo ensure reliable operation, these sensitive systems require a PLC cabinet —a specialized enclosure designed to protect electronics from environmental hazards, manage heat, organize wiring, and facilitate maintenance. This article explores what a PLC cabinet is, key design considerations. (1) Waterproof distribution box engineered for harsh outdoor and industrial environments, providing IP65–IP68 sealing against dust, rain, and UV. In addition, shield clamps enable EMC-compliant wiring. Furthermore, sockets and service interfaces facilitate. Bartakke's enclosures are designed to house control panels, PLC systems, switchgear, drives, sensors, and power distribution units — ensuring your electrical infrastructure operates safely, efficiently, and without interruption. We offer a wide range of IP65/IP66-rated mild steel, stainless steel.

Frequently Asked Questions

What is a PLC Cabinet?

A PLC Cabinet is a secure enclosure that houses a Programmable Logic Controller (PLC) and its accessories, offering protection from environmental a...

What is PLC and PCB?

PLC is an industrial computer used for automation, while PCB is a circuit board that connects electronic components.

What are the different types of PLC boards?

PLC boards vary by application and can be relay output, analog I/O, digital I/O, or communication boards.

What are the 3 types of PLC?

PLCs come in three main types: compact, modular, and rack-mounted, each suited for different industrial needs.

What are the components of a PLC panel?

A PLC panel typically includes a PLC processor, I/O, power supply, and communication modules.

What is a PLC System?

A PLC system is a complete setup for industrial automation, consisting of a PLC, I/O interfaces, and often software for control and monitoring.
